QVis mouet hos orbes virgo quis tem-
perat inquam
Tantæ molis iter? campis ego ſemper ab imis
Suſpiciens tanti motus cognoſcere cauſas
Iam pridem volui. Tales dedit illa loquelas
Aethereæ mentes, quæ corpora nulla nec artus
Accipiunt, magni iuſſu ſubiere tonantis
Munus id, a prima cum fluxit origine mundus
Cernis vbi phœbus ſummum iam porrigit orbem
Perpetuæ ſedes animis motricibus illic
Sed propera: niuei viden aurea cornua tauri?
Præcipiti ſub fronte hyades: a clune coruſcant
Pleiades vernæ. Nobis iam circulus alter
Scanditur: hunc alius curuato limine cingit.
Signifer: at nullæ pingunt animalia formæ.
Nec varios vſq; ſtellarum ſuſcipit ignes.
Lucet enim glaciemq; refert vitrumq; colore:
Criſtalliq; tenet nitidos cum nomine vultus
Hinc ſua cœleſtes ſumunt exordia motus
Hic alios ſecum magno molimine voluens
Raptat: & in boream lentis declinat ab auſtro
Paſſibus: & retro ſua per veſtigia fertur

Sed totum flāmis circumlambentibus orbē

Pone metus. aude tantos te inferre per ignes
Fide mihi. illęſum ſummo te culmine ſiſtam
